INFORMATICA & SISTEMI

Sirio informatica e sistemi can draw on over thirty years of consolidated experience, during which advanced productive criteria and specialized know-how have always been applied with industrial rigour.

On the market since 1974, Sirio, now informatica e sistemi, has produced value for their own customers, a result of a policy which has always placed high value in efficiency and seriousness.

Nowadays Sirio informatica e sistemi operates in fields of management software and services, where informatics and know-how apply to the maximum levels.

The main points of our philosophy are reliability of products, competence in services, continuity in technical evolution and protection of investment made by our customers.
